Vision and Mission	Vision: Society that accesses quality health, education, good moral, peer rights, better environment and Sustainable Agriculture.		

	<p>Mission: To help people help themselves we seek to restore the dignity and quality of life for people affected by diseases, poverty, abuse and unemployment by eliminating barriers to success through innovative education, environment and health protection, entrepreneurial development, teaching good moral, sustainable agricultural and community-driven aid through front line work, prevention and advocacy, being a facilitator and enabler, galvanizing people and resources in Tanzania.</p>
<p>Strategic Objectives (Refers to your Strategic Plan)</p>	<ol style="list-style-type: none"> 1. Empowering/awakening the communities to own and manage the environmental resources sustainably using their indigenous knowledge and incorporating science and technology where necessary. 2. Promote and advocate for the full realization of the rights and wellbeing of all peer in Tanzania. 3. Raising awareness of good moral in the Society of Tanzania to increase level of respecting each other. 4. Raising awareness of farmers access sustainable agricultural and food security hence increase level of production as well as quality products. 5. Promote national and international, multi-stakeholder collaboration and actions for rare diseases. 6. Promote conducive teaching and learning activities in Education / Capacity Development.
<p>Brief Current activities and locations (districts and regions) where the activities are conducted</p>	<p>We are currently in the process of identifying children and women who live in difficult conditions in the Mwanza city district, Mwanza region. We have had that process which has led to finding women and children who live in difficult conditions while they are in need of housing, clean toilets and modification of the places where they live.</p>
<p>Success stories</p>	<p>In identifying women and children in need, we have found ourselves succeeding in knowing the family of a mother who lost her husband and left children who she is trying to find through entrepreneurial activities and educate them and find food for them. Due to life being difficult, the children have found themselves entering into the challenge of protection because she has to spend a lot of time away from them. But also in her search she has found herself in a dangerous situation as he has to sell her products by walking. Here are picture:</p> 

In ensuring that we build the capacity of women to provide education and avoid child marriages, we managed to establish Mlezi Mwema a group of women who are engaged in making alternative charcoal (briquettes) to generate income and avoid being manipulated by people who are not good who can use the need for money to harass or even force child marriages. You can see their picture ere:
